Phosphatidylcholine Push

*For patients experiencing symptoms of Lyme's Disease, liver toxicity, cardiovascular disease and neurological disorders.*

As we age, the phospholipid makeup of our cell membrane changes, becoming more rigid and less flexible. Administering phosphatidylcholine increases the fluidity of the cell membrane and passes through the Blood Brain Barrier in order to help move natural critical neurological processes along. This allows the Phosphatidylcholine to be used in creating acetylcholine, a critical neurotransmitter in the body. Phosphatidylcholine also reduces liver toxicity by nourishing the cell membrane and fortifying it against toxic buildup and infection.

*Treatment may be effective for:*

*Lyme's Disease • Anti-Aging • Cell Repair • Memory Loss • Alzheimer's Disease • Anxiety • Brain Fog • Respiratory Distress • Bartonella • High Cholesterol • Premenstrual Syndrome (PMS) • Manic Depressive Disorders • Hepatitis C • Eczema • Gallbladder Disease • Circulation Issues • Kidney Dialysis • Immune Support • Post- Concussion Syndrome*

# MOTHER GLUT

## Glutathione Push

*For patients experiencing symptoms of oxidative damage, leaky gut/brain, blood sugar imbalance, and mold toxicity.*

Glutathione, the body's most essential antioxidant, is referred to as the "mother of all antioxidants," because of its sulfur content that sticks to, and rids, the body of free radicals, heavy metals, and environmental toxins. Stress, medications, aging, and bad health can deplete glutathione levels that are critical for our body's function. This leaves the body receptive to oxidative damage caused by free radicals, resulting in DNA damage, impaired cellular function, and increased signs of aging and illness. Because glutathione is not typically absorbed well by your body, Glutathione IV therapy is ideal to bypass the bloodstream and ensure 100% absorption. Research has shown that Glutathione helps clear the oxidative damage in the lungs and body, including those caused by tobacco product use. It has also been proven to fight off viral, microbial, and parasitic infections

# IMMUNO BOOST

## Vitamin C Drip

*For patients experiencing symptoms of scurvy, mold toxicity, immunodeficiency, and cancer treatment.*

Vitamin C is an important antioxidant for immune health that works by fighting off damaging free radicals and protecting against environmental oxidative stress. Research also shows that Vitamin C is vital for the repair and maintenance of healthy bones, teeth, skin, and cartilage. One of the most overlooked uses for Vitamin C in the body is its role in regulating stress, as your adrenal glands contain the highest concentration of Vitamin C in the body. Your adrenal glands have the highest concentration of Vitamin C in the body, and they are responsible for releasing hormones that aid your body in coping with stress. As opposed to oral supplementation, intravenous vitamin C therapy has proven to have a significantly greater effect on immune enhancement and cancer cell death. When given through an IV, high levels of Vitamin C in the blood generates the production of hydrogen peroxide, a known toxin to cancer cells. This causes the Vitamin C to act as a pro-oxidant, similar to some cancer therapy mechanisms but without the toxic side effects. In regard to improving general health and immune functionality, receiving Vitamin C intravenously rids the need for its daily oral supplementation.

# LIQUID GOLD

## Myers' Cocktail Push

*For patients experiencing symptoms of chronic fatigue syndrome, digestive disturbances, fibromyalgia, and Lyme's disease.*

The Myers' Cocktail is considered the “Gold Standard” for delivering intravenous vitamins and minerals directly to your bloodstream. The late Dr. John Myers pioneered this use of intravenous nutrient therapy in the 1960's and saw great success in his unique injection. It works by increasing the blood concentration of several essential vitamins and minerals beyond that of which can be achieved through oral supplements, as it is absorbed immediately into your bloodstream. Our Liquid Gold, especially when paired with our Glutathione, is beneficial to everyone in maintaining optimal health, boosting the immune system, and improving overall energy levels. When looking at pain management, it is used especially in Fibromyalgia patients, as well as athletes in recovery and performance. Those who've received Myers' Cocktail treatments report feeling energized, perky, and pain-free. Some have noticed tighter facial skin and a healthy all-around glow.

# THE ALPHA

## Alpha Lipoic Acid Drip

*For patients experiencing symptoms of neuropathy, brain disorders, and liver disease.*

Alpha Lipoic Acid, or ALA, is a powerful antioxidant that has the ability to cross over the cell membrane, allowing it to enter the brain and dispose of free radicals. Unlike other antioxidants, it is classified as a phospholipid, meaning it is both water and fat-soluble and can work in all of the tissues of your body. ALA is also unique because it helps your body restore levels of Vitamin C, Vitamin E and Glutathione, the mother of all antioxidants while simultaneously protecting your cells. ALA has been used intravenously for the last 30 years for patients with adult-onset diabetes. Research has shown that when used regularly, Alpha-Lipoic Acid reduces insulin resistance and increases cellular utilization of glucose by more than 50%. In regard to neuropathy, ALA administered intravenously works to repair nerve damage and repairs damaged cells. ALA therapy has also been used to promote healthier skin by helping reduce puffiness, dark circles, and the appearance of pores.

# REVIVE & THRIVE

Hydrogen Peroxide Drip

*For patients experiencing symptoms of toxicity, viral infections, cancer and influenza.*

There's a reason why Hydrogen Peroxide IV Therapy is considered to be one of most powerful natural healing treatments available today. Patients rave about their miraculous healing stories, ranging from a variety of viruses and diseases, accredited to their intravenous H<sub>2</sub>O<sub>2</sub> intake. By replenishing the body of oxygen, the environments that anaerobic organisms rely on are destroyed, therefore killing the viruses, bacteria, and cancer cells that live in them. More key benefits include the stimulation of white blood cell production for immune support, the breakdown of calcium deposits within blood vessels, regulation of mitochondrial membrane exchanges, lowering of cholesterol levels, and ATP production for increased energy levels.
